

10 reasons

Why you should be part of The Lighting Association?

1.

You are not alone

Whether large or small we work together with you and your organisation to address the issues facing your business.

2.

Technical

By phone, email, information sheet, technical bulletin or seminar you have the support of our expert team behind your business. We unravel the relevant regulations, standards and legislation for you.

Through the LA, you are represented on over 40 UK, European and International technical committees relating to lighting.

3.

Accreditation to be Proud of

LA Accreditation to Code of Practice (CoP) has been developed to substantiate a members claim for compliance with European Legislation for luminaires.

Visiting annually in excess of 120 UK/European members and 50 suppliers in Far East to provide technical advice supported by additional regular training seminars, courses and calibration

4.

LA Laboratories

We pride ourselves on the personal service and care we give to our clients. We are a Notified Body specialising in Lamps and Luminaires and a Certification Body Test Laboratory (CBTL).

We are the one stop solution for all your testing needs and the only dedicated lighting laboratory.

5.

LED's

Our LED Working Group is now an established forum for the LED industry and has worked with the Energy Saving Trust to deliver the first specification for LEDs to enable them to attract subsidies under the CERT scheme and gain Energy Saving Recommended status.

The Lighting Association can always be relied upon for full technical & legislative support, received in a timely and objective manner utilising its wide range of Lighting Industry expertise.

Neil Linden-Smith GE Lighting Ltd

6.

Lighting Dispute Resolution

Once in a while, despite the best efforts of your organisation, you have a dissatisfied customer.

We can provide an independent report reviewing the entire situation which may lead to a timely resolution, maintaining end user satisfaction and keeps your reputation intact.

7.

New Technology

At the LA we keep our finger on the pulse of new technology and work to pair emerging ideas with companies who have routes to market.

Our laboratory is always updating its services to stay in line with developments.

8.

Commercial Opportunities

Through energy efficient luminaire and lamp subsidy schemes, government projects and even product development.

We seek out opportunities for members worth millions of pounds.

9.

Networking

One priceless benefit of membership is the ability to meet and network with your competitors and other industry colleagues.

We provide countless opportunities through meetings, seminars, training courses, working groups etc.

As the Technical Director of an Industrial and Commercial lighting manufacturer I have no hesitation in stating that

The Lighting Association has been an invaluable and supportive partner of PLM Illumination Limited

Julian Ding PLM Illumination Ltd

10.

Lobbying

Legislation has many far reaching consequences on your business. Without our tireless lobbying on behalf of LA members, much of this legislation would have a seriously detrimental effect on the lighting industry. We have direct links to UK Government Departments, MP's and Ministers and, via CELMA, to the EU Commission.
